W-07019

March 14, 2007

MEMORANDUM FOR: Write Your Own (WYO) Principal Coordinators
and the NFIP Servicing Agent

FROM: WYO Clearinghouse

REFERENCE: WYO Clearinghouse Bulletin W-06035 dated May 30, 2006

SUBJECT: Update on Adoption of Advisory Base Flood Elevations

In the wake of Hurricanes Katrina and Rita in 2005, FEMA began developing Advisory Base Flood Elevations (ABFEs) to help impacted Gulf Coast communities in their rebuilding efforts. Eligible communities were told that, if they adopted and enforced the FEMA-provided ABFEs, the Increased Cost of Compliance (ICC) benefits under the National Flood Insurance Program would be made available in those communities to elevate buildings to the new, higher ABFEs instead of to the BFEs shown on existing Flood Insurance Rate Maps.

The May 30, 2006, bulletin referenced above listed the communities in Mississippi and Louisiana, by county or parish, that had, at that time, adopted ABFEs or freeboard requirements or a combination of both.

The accompanying materials update the May 2006 lists of communities through February 1, 2007.
